# 1 Introduction

This document describes how to run Visualizer 3D software explicitly in administrator mode of Windows Vista. Users of Windows XP operating systems are not affected by this issue.

## 2 Setting up administrator mode

In Windows Vista you have to execute the program as administrator. It is not enough only to log in to the system as administrator. You have to open the program explicitly in the administrator mode. Therefore two different ways are possible:

- You can open the program explicitly in the administrator mode every time.
- You can configure the program that every time the administrator mode will be executed automatically.

### 2.1 Start program only one time as administrator

Open the **Start Menu** and search for the entry of your software ("Visualizer 3D"). Now click with the right mouse button on it to open the menu from figure 1.

*Figure 1: Run as administrator*

In this menu you have to select the entry **Run as administrator** and click on it with the left mouse button. Confirm the security question shown in figure 2 with a click on "Allow".

Figure 2: Windows Vista - User Account Control

After allowing the application, the program will execute explicitly in administrator mode.

## 2.2 Always start program as administrator

If the program should always be started automatically in the administrator mode, open the start menu and search for the entry of your software. Now click on it with the right mouse button to open the menu like represented in figure 1 on page 3.

Figure 3: Open program properties

In this menu you have to select the entry **Properties** and click on it with the left mouse button. A dialog window as shown in figure 3 on page 4 will appear. There you have to click on the button **Advanced** to open the dialog window from figure 4.

*Figure 4: Configure program as administrator*

Check the entry “Run as administrator” and confirm the selection by clicking on the button “OK”. Close all open dialogs now.

After that you can just use a normal left mouse click to run the Visualizer 3D software from your start menu as usual. Confirm the security question always with a click on “Allow” to execute the program in administrator mode.
